

ESCAPE-CHAIR®

StandardPLUS model

With the help of the Escape-Chair®, only one operator is needed to assist a mobility impaired person down the stairs to safety.

Advantages Escape-Chair®:

- needs one operator only
- ready to use in seconds
- does not block the stairways
- **you** decide how quickly you descend
- easy participation of the evacuation flow
- fits into every safety plan

The Escape-Chair® comes in various designs:

- Standard-ALU
- Standard
- **StandardPLUS**
- Comfort

Comfort model

Escape-Chair® StandardPLUS

Technical information:

Weight: app. 11.2 kg
Load: max. 150 kg
Measurements (folded):
 - Height: 120 cm
 - Width: 51 cm
 - Depth: 21 cm

1. Padded head rest with head restraint
 2. Two-height adjustable handle
 3. Compartment under the seat for personal documents of the evacuee
 4. Extra wide wheelbase for stable horizontal transportation
 5. Anti-slip on handle and lower frame
 6. The glidebelts are assembled in a protectively enclosed glidebelt cassette
 7. Comfort seat
 8. Double ergonomic back support
- Hardened aluminium frame
 - Interlock of handle on outside frame (so the evacuee can not unlock by accident)
 - Seat and head rest are equal to the international escape route colours green/white
 - 6 Year warranty (not including general wear and tear)

Available with:

- Foot rest. We advice you to use a foot rest to support the upper legs during an evacuation from higher floors.
- Arm rests. We advice you to use armrests to provide the evacuee with a secure feeling during the evacuation.
