

GO-Kart

This newest addition to the RTS Kiddie Cart line provides an entertaining family experience, maintaining top of mind awareness with your customers.

Designed to fit through standard aisles and checkouts. The RTS GO-Kart is designed for maximum maneuverability and control.

The cart body and dash is manufactured by a rotational molding process using commercial grade, UV stabilized polyethylene resin - ensuring the colour will last!

Available in 8 standard colours and four standard graphic designs; Fire, Police, Taxi, and Princess. Or create brand awareness with customized graphics and colours- call us for details.

The large undercarriage has open sides for cashier observation. No hidden product minimizes costly inventory shrinkage and product loss.

The two-tier basket design allows the GO-Kart to nest 33% with other two tier designs, reducing the floor space required for storage. The cart chassis and basket have a rust proof finish, with a total capacity of 12,750 cubic inches.

Dimensions:

27" W x 42" H x 52" D | Capacity: 12,750 cu. in.
